

keeping it in line.

PLATING PROCESS TANKS

APR Plastic Fabricating manufactures plating process tanks using our high-impact resistant Copolymer Polypropylene material.

Copper bussed plating tank

Plating Process Tanks

Utilized heavily in the automotive and hardware industries, APR's process tanks are ideal for coating steel parts and electroplating.

- Safely handles all the chemicals, cleaners and rinses for your process
- Racks, baskets and barrels available for your needs
- Built to your custom specifications - any size, shape and capacity
- Industry standard warranty or extended 5-10 year plans
- Accessories available for complete installation

Get the most out of your plating process tank by adding a custom liner from APR.

- Built using a superior construction process
- Provides an additional support system for the tank
- Prolongs the life of your investment
- Internal corner reinforcements applied on larger liners
- Both rigid and flexible liners available
- Convenient on-site installation where required
